Dear Registrar and Admissions Officer,

I am writing to highly recommend Jeremy Lucas for the Masters of Machine Learning program at Carnegie Mellon University. During Jeremy's internship at Kruger, Jeremy demonstrated exceptional technical skills, a proactive approach, and a solid work ethic that greatly contributed to our team.

As an engineering intern, Jeremy consistently exhibited a strong understanding of engineering principles and applied them effectively to solve complex problems. Despite still being a student, he showed technical proficiency and a keen ability to learn and adapt quickly. Jeremy was always eager to take on new challenges and proactively sought out opportunities to improve his skills.

One of the most impressive qualities of Jeremy was his problem-solving skills. He approached each task with a logical and analytical mindset, ensuring that all aspects of the problem were thoroughly considered before proposing solutions. This approach not only led to effective problem resolution but also inspired confidence in their colleagues.

In addition to his technical abilities, Jeremy was highly approachable and worked well with all team members. He communicated effectively, collaborated seamlessly, and always maintained a positive attitude. His ability to build strong working relationships with colleagues at all levels was a testament to his interpersonal skills and professionalism.

I am confident that Jeremy will excel in the Masters of Machine Learning program and make significant contributions to the field. His dedication, technical expertise, and collaborative nature make him an ideal candidate for this program. I wholeheartedly recommend Jeremy for admission to this program.

Best regards,

James Gunn, P.Eng, MMP
